Laser Pulse
$S(t)$
Photoexcitation
Carrier System
Temperature: T_e
Density: N
Heat Capacity: $C_e(T_e, N)$
T_e, N
Drude Conductivity
$\sigma(T_e, T_l, N) = \frac{Ne^2\tau(T_e,T_l)}{m^*}$
Energy Transfer
$K(T_e - T_l)$
K
Lattice System
Temperature: T_l
Heat Capacity: C_l
T_l
